

BUZ Product Overview

New Product Overview

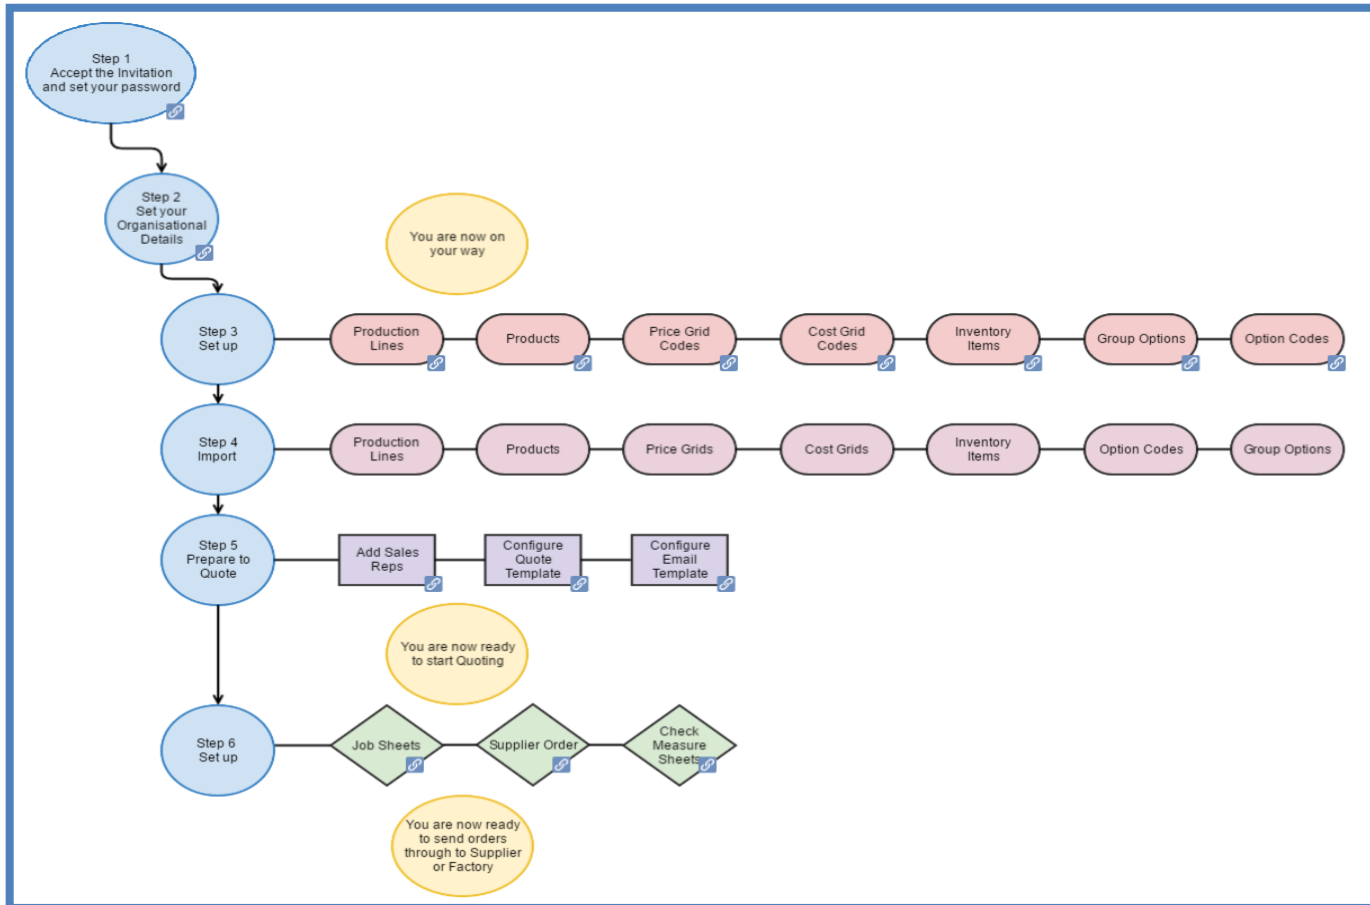

Creating a new product is exciting but don't feel like you are on your own. If you are starting a New Product let us know we have Group Options, Job Sheets, Material lists and much more to provide you so you are not starting with a blank page.

- There are a few main steps that you will go through up set up a New Product and they are
- Production Line – is this product going on an existing production line or do you need a new one
 - Group – what are you going to call it IE: Curtains, might have 2 types of Curtains within the Group 1. Curtain and 2. Tracks Only (this is not uncommon)
 - Inventory Items – what is the 1, 2 or 3 things that will give you the main price IE: Rollers will be Material (Descn Part 1), Type (Descn Part 2) and Colour (Descn Part 3) but the Vertical Tracks Only might only have Track Type (Descn Part 1)
 - Option Items – These are the same as Inventory items but they can not be ordered on their own so they are set up with just a Code and a Description with a price grid or coefficient added
 - Price Grids and Cost Grids or Coefficients or Both – If you are using price Grids these will need to be set up
 - Group Options – What are the questions you need to ask the customer and will include any extra Option prices

Flow Chart

To go through adding a new product there is a graph to make it easier to follow in our help area. This also has links to each section for more detail. This is what our customer use when signing up to BUZ but is a handy tool to refresh your memory on what is needed. Follow this link to get to the flow chart

Production Line

The Production Line is also call Job Tracking Line. This is used to group products together that are made in the same Production Line or factory. You will need to add a code, description and enter the turn around times and amounts that can be finished in a day. BUZ used this to give you a Dispatch Date. If you have more that 1 production line in an order BUZ will use the longest date and production line to give the dispatch date.

No data to display

Groups

You are required to fill out most fields, but the mandatory fields are

1. Description
2. Code
3. Descn Part 1 (2 & 3 optional)
4. Job Tracking Line (this is the Production Line)

The screenshot shows a web form for creating or editing a group. The form is divided into several sections. The top section contains fields for Description (with 'Rollers' entered), Code (with 'ROLL' entered), Sequence Number (with '100' entered), Sales Account (with '4-2300 - Sales' selected), and Cost Account (with '5-0000 - Cost of Sales' selected). Below this are fields for Max Discount Percentage (25.0000), Production Extra Days (0), Install Standard Minutes (8), Check Measure Lead Days (7), Production Standard Minutes (1), and Check Measure Standard Minutes (2). There is also a checkbox for 'Multiply Install Minutes by Square' and a radio button for 'Metres'. The bottom section is titled 'Job Tracking (Default)' and contains a table with columns for 'Can be ordered', 'Use Part', 'Description Part', 'Material', 'Material Type', and 'Colour'. The 'Can be ordered' checkbox is checked. The 'Use Part' checkboxes are also checked. The 'Description Part' column has three rows: 'Description Part1', 'Description Part2', and 'Description Part3'. The 'Material' column has three rows: 'Material', 'Material Type', and 'Colour'. The 'Job Tracking (Default)' dropdown menu is set to 'Rollers'. The bottom of the form has an 'Image:' section with a 'Select file' button and a 'Group options (Dates Imported):' section with two dates: '17/06/2016' and '16/05/2016'.

Inventory groups for **options** only need a Description and Code. Option groups can not be ordered, don't require and Descn part 1, 2 or 3 and don't have a job tracking line as they are only an add on to the main inventory group/product

Inventory Items and Option Items

Inventory Items and Option Items are used to attach pricing and they can give you the first 3 questions when ordering a Product.

For the Inventory Items you can have 1 to 3 fields used to describe the Inventory item IE: Descn Part 1, Descn Part 2 and Descn Part 3 – Dawn Blockout White or you may choose to only use 2 Descn Part 1, and Descn Part 2

For Option Items you will only need to enter in a Code and a Description as these items are ordered as part of the Product and not the main item

Yellow areas can be added in if you need Material , Type, Colour, Price Grids, Cost Grids and Discount Groups

Group Options

Group Options are the Question that are specific to each Product. Within these questions you can add in your Option Items and they will then price as you have set them to.
